SHAPE

Designed by Marc Sadler, the LULLABY is a suspended sound absorbing fixture with high quality lighting, available as single fittings or as a selection of “Clouds”, three preconfigured exclusive configurations with amazing visual impact.

lullaby

marc sadler

Designed by Marc Sadler, LULLABY is a suspended luminaire that combines acoustic reduction with high-quality lighting, thanks to PROLICHT's advanced technology and materials. It is available as individual elements for custom configurations or as preconfigured sets for faster specification.

lullaby

shape. colour. freedom.

In its single fitting version, the LULLABY portfolio offers six different shapes, to be used either as stand-alone fixture or in personalised compositions. A rich palette of acoustic colours brings depth, warmth and character to any project.

850 x 450 mm

lighting technology

LULLABY is equipped with an exclusive micro raster optic integrated in the edge of the sound absorbing panels, guiding light and preventing glare.
