SOPHISTICATED INNOVATION

PROLIGHT
designed to create

POINT

Light, reduced to precision

MAGIQ is designed to deliver exceptional lighting control while remaining visually discreet. Defined by accuracy, uniformity and minimal presence, it enhances architecture by revealing surfaces and details with clarity and restraint. Advanced technology that stays in the background, allowing architecture to take the spotlight.

magiq

magiq

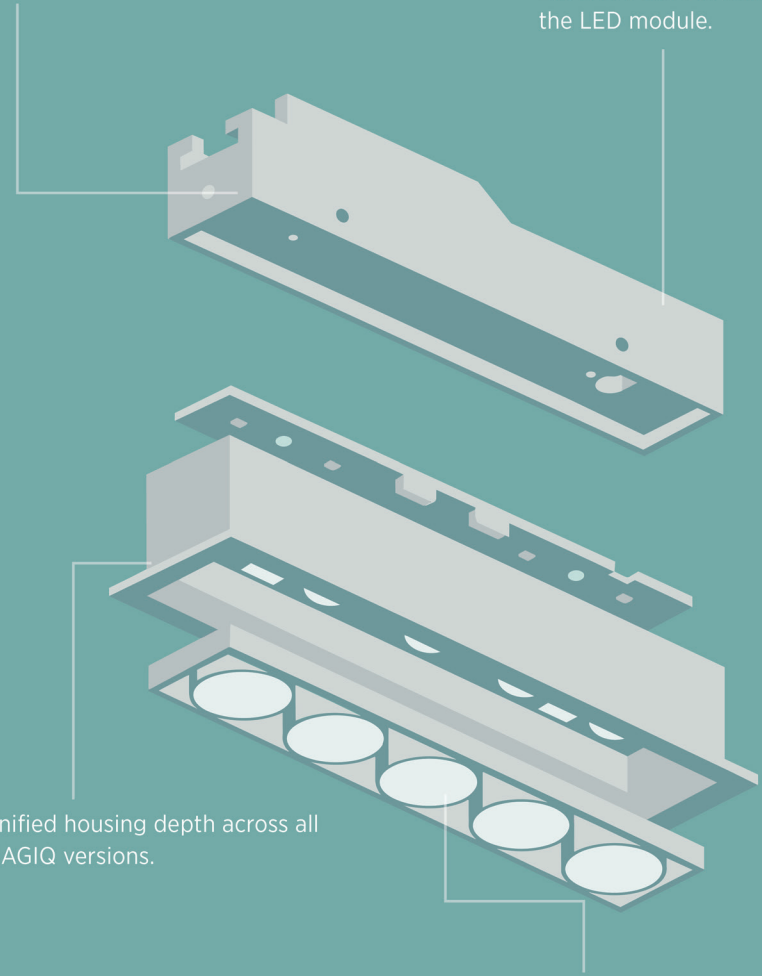

magiq

housing

Die-cast aluminium housing designed as a passive cooling body.

Ensures stable thermal conditions for the LED module.

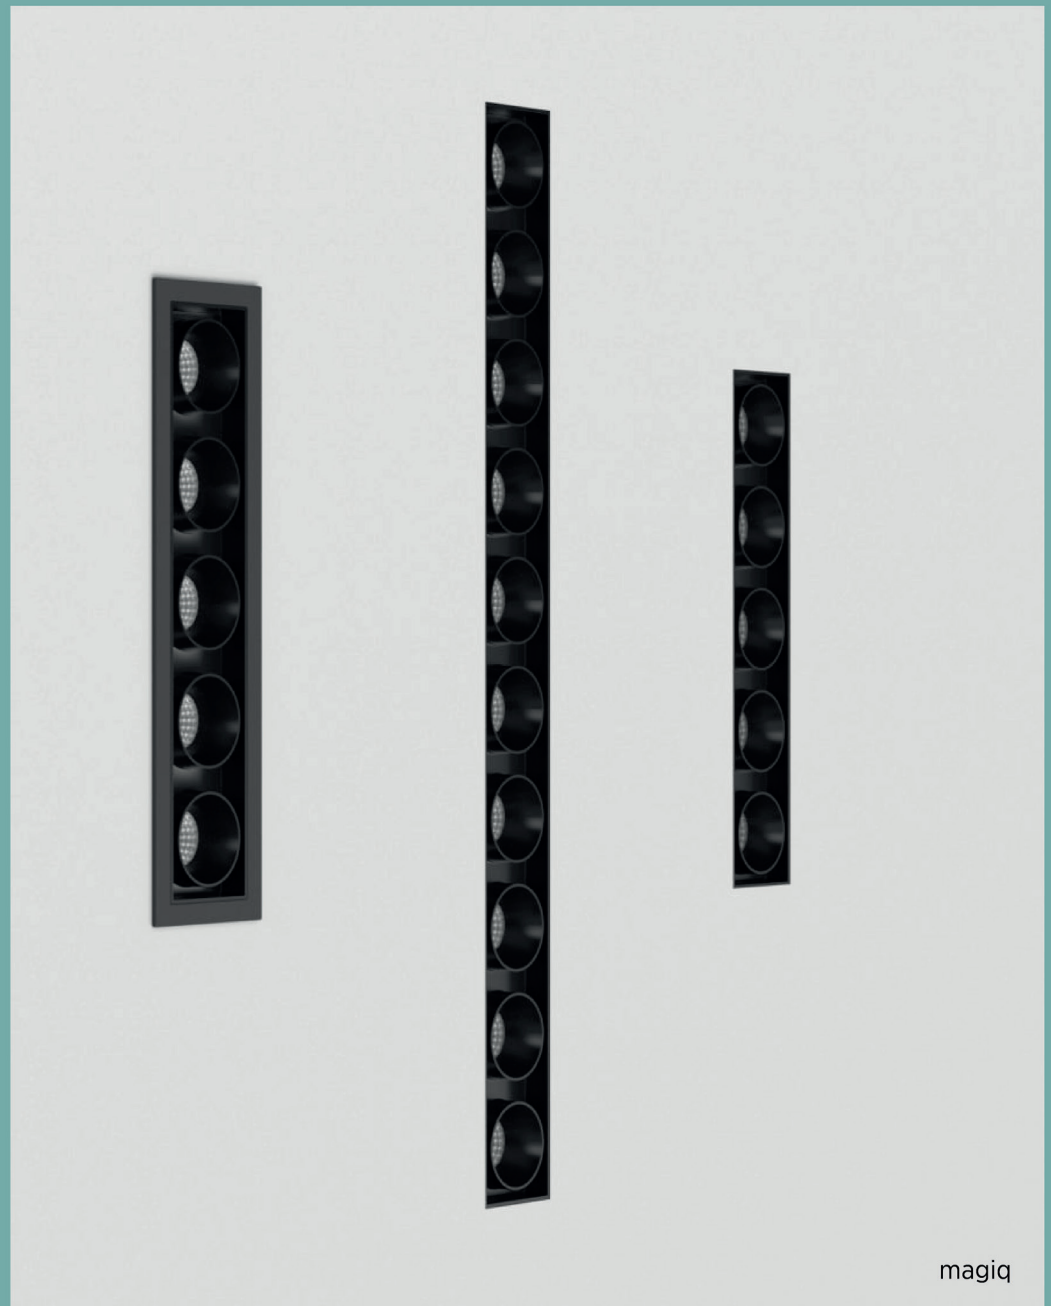

Unified housing depth across all MAGIQ versions.

Prewired construction prepared for direct LED board integration.
