INFINITE
SOLUTION

PROLICHT
designed to create

LINE

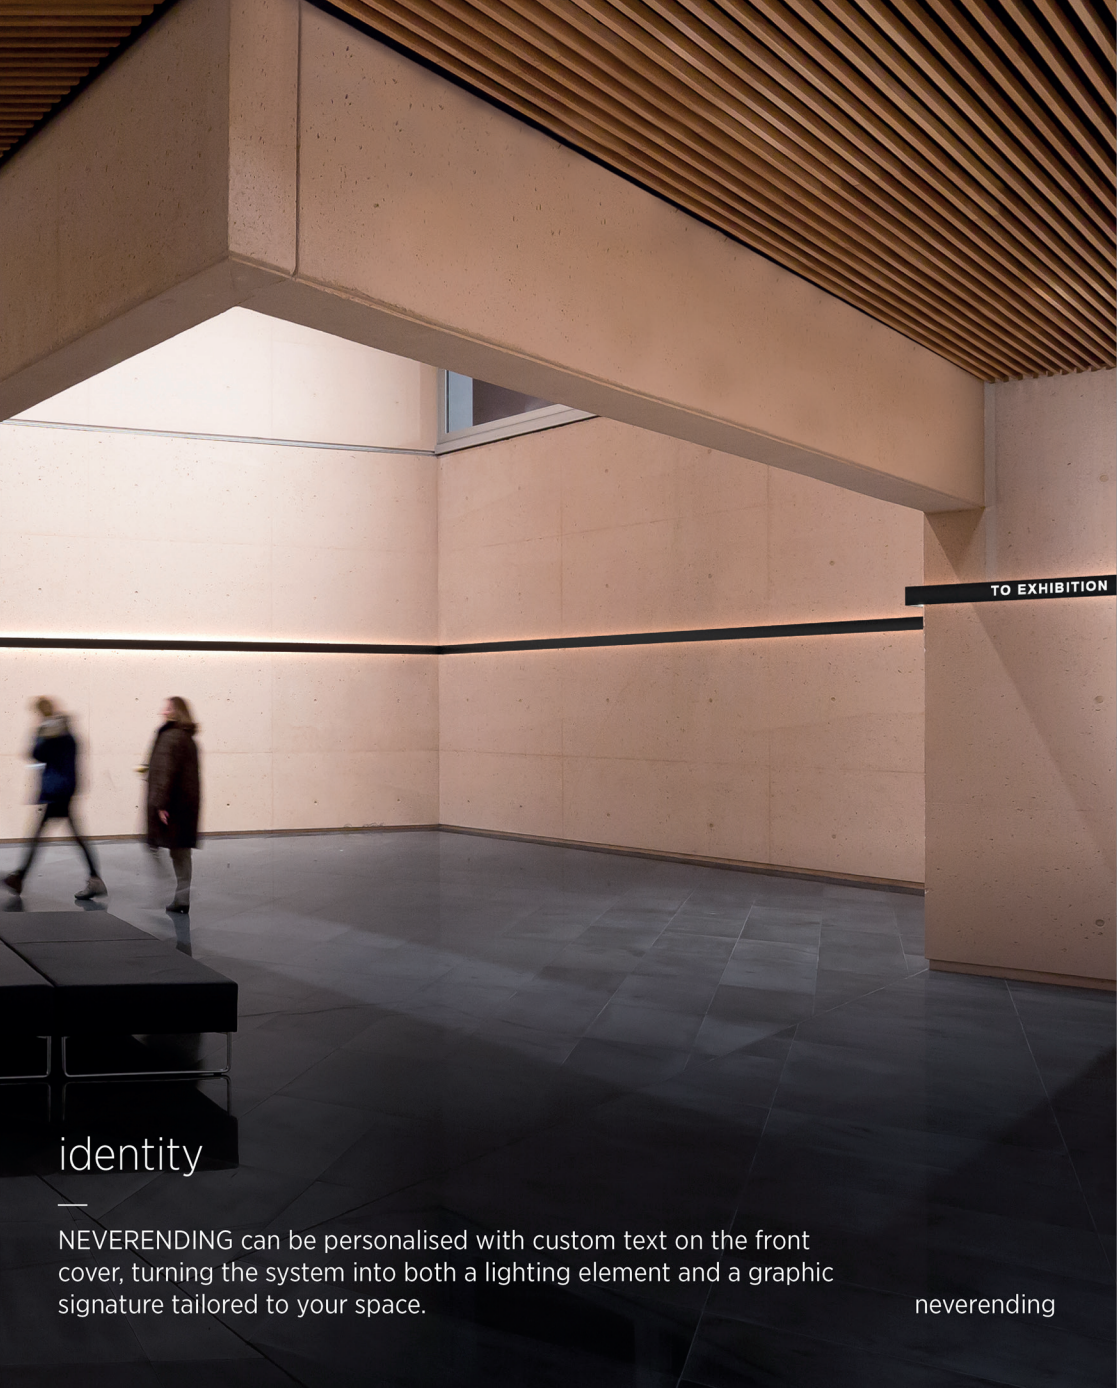

NEVERENDING is a continuously expandable wall-mounted lighting system with a minimalist design that highlights spatial geometry. NEVERENDING can run along walls without interruption to offer an ideal guidance solution for corridors and long routes.

neverending

neverending

identity

NEVERENDING can be personalised with custom text on the front cover, turning the system into both a lighting element and a graphic signature tailored to your space.

neverending

coloured diffusers

The system provides direct and indirect lighting, with an internal reflector that distributes light evenly. The profile can be finished in a wide range of PROLICHT colours.

SYSTEM

NEVERENDING

continuous lines

—
The profile can be extended as required to run along or across walls, creating continuous lines of light. This makes NEVERENDING ideal for use as a guidance system for long routes in any building. Emergency lighting packages (1–3 hours) are available on request.
