DON'T BE A SQUARE

PROLICHT
designed to create

SHAPE

SIGN provides classic illumination with a contemporary twist. Its seamlessly rounded surfaces create a subtle and elegant presence. Combined with a variety of sizes and arrangements, SIGN can become a defining architectural element.

sign

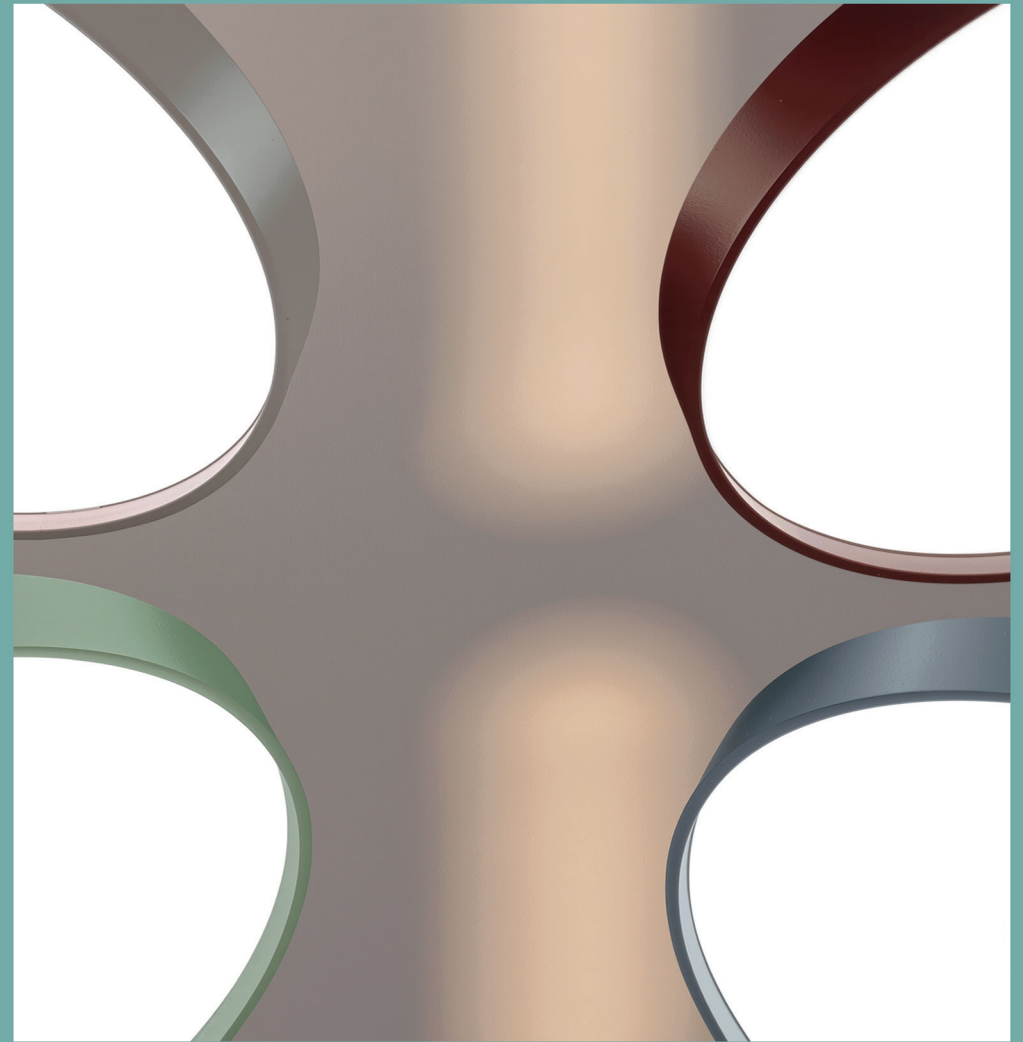

sign

sign

The SIGN collection is defined by its timeless circular geometry and versatile mounting system, which enables both discreet integration and expressive architectural use. The collection comprises two distinct lines: Sign Evo, which focuses on high efficiency, and Sign Diva, which offers extended design freedom. Either option delivers precise light, consistent quality and a clear architectural presence.

sign

sign

SIGN is a versatile luminaire family defined by a timeless circular form and a calm architectural presence. Designed to deliver uniform, high-quality light with reliable performance, it provides a consistent solution for architectural and large-scale commercial applications.

166 lm/W: the real efficiency

The High Efficiency version of SIGN delivers powerful illumination with exceptional energy efficiency of up to 166 lm/Watt and UGR values below 19. Ideal for large-scale office projects, it combines high lighting performance with sustainable energy savings and excellent cost efficiency.

tunable white

The integration of Tunable White technology enables precise colour temperature adjustment, supporting human-centric lighting concepts and creating adaptable environments for work and well-being.

ip54 version available

Sign Evo and Sign Diva are available with an IP54-rated version, offering reliable protection in areas with increased environmental demands.

unique decorative optics

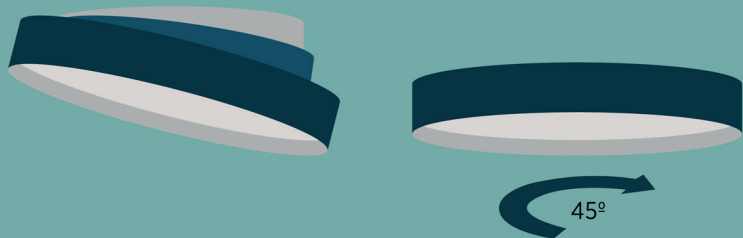

Optimised PCB boards and specialised LED chips ensure excellent light transmission with the Opal Diffuser, while the Microprismatic cover delivers bright, low-glare lighting for workplaces. Two decorative options complete the range: Sparkling Secret for enhanced LED sparkle, ideal in hospitality settings, and Vintage Industrial with a honeycomb-prismatic effect that varies by viewing angle.

MICROPRISM SPARKLING SECRET OPAL WITH SHINER VINTAGE INDUSTRIAL OPAL

straightforward installation

Surface-mounted versions can be installed quickly using a simple mount-and-twist system. They are supported by a canopy with an integrated cable channel that allows for flexible cable entry. Pendant versions feature a refined canopy that conceals suspension grippers, enables minimal suspension heights and incorporates a cover plate to provide a neat finish and facilitate maintenance.

sign evo

With efficiency of up to 166 lm/W, SIGN delivers high-performance lighting within a calm, circular system.

Available with opal or microprism optics, it offers balanced light distribution and visual comfort, combined with reliable performance, flexible control options and straightforward installation.

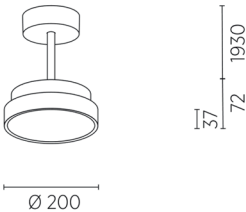

sign diva

Those seeking expressive designs and creative freedom will love Sign Diva's playful flexibility and dynamic adjustability. It turns light into a design statement while maintaining uncompromising quality.

The Sign Diva Pendant has an elegant, slim profile, making it ideal for rooms with low ceilings. It is available in a range of sizes with optional lighting technologies.

sign diva tube

Sign Diva Tube is a pole-suspended variant of the sign pendant range, combining efficiency with a dynamic look. Its slim profile enhances atmospheric interior design.
