

About PROLICHT

Press release. Götzens, June 2026.

PROLICHT is an international premium manufacturer of architectural lighting solutions, characterised by a shift in perspective: away from the product, towards people. “Designed to Create” embodies a commitment to enabling creative freedom: PROLICHT develops lighting systems that allow architects and designers to shape spaces in ways that are atmospheric, functional and emotional. The focus is not on the product itself, but on the effect of light – spaces that move people, atmospheres that work, and experiences that leave a lasting impression. Light is not an object, but a tool for design, mood and transformation. Our motto is: “New doesn’t just happen, new is created.”

PROLICHT sees itself as a platform for ideas: flexible lighting systems, digital tools, rapid production and reliable support enable seamless planning, uncompromising quality and inspiring results, whilst fostering creative freedom and collaborative partnerships. Every project is unique; our solutions adapt to every vision, not the other way round. To create products that combine technological precision with design diversity, we collaborate with leading international designers and trendsetters. Many of these collaborations have become integral parts of our range, featured in global flagship projects and innovative architectural concepts.

As an internationally active company, PROLICHT has a production facility at its headquarters in Götzens, Austria, and another production facility in Valencia, Spain, as well as a global sales network with partners in over 70 countries: ensuring the highest quality, short response times and maximum customer focus. Today, the company employs around 300 staff worldwide. Efficient processes, a clear focus and a lean organisational structure form the basis of our success. Environmental and social sustainability, responsible material selection and resource-efficient manufacturing are an integral part of our corporate strategy and the foundation for the commercial success of PROLICHT GmbH.
